WORK EXPERIENCE

Hackazouk, Inc.

Jul 2018 — Present

Junior Software Engineer

- Builds HR Tech product features and maintains its stability and performance for the tech arm of a Japanese startup
- Collaborate cross-functionally with quality assurance and software development engineers, UI/UX designers, data analysts, business users and consultants both locally and abroad
- Develops software solutions by conferring with the respective consultants for our various company clients, studying their data needs and usage, investigating problem areas, and following the agile software development lifecycle
- Improves operations by conducting systems analysis; recommending changes in policies and procedures
- Ensures proper documentation with flowcharts and diagrams as well as code readability with useful comments and standard coding rules (e.g. ESLint).

St. Luke's Medical Center - Global City

Oct 2013 — Dec 2017

Therapeutic Dietitian

- Interpreted diet prescriptions, conducted trayline inspections, checked the quality and proper portion control of patients' food, applied personnel management skills in hospital food service, and participated in ward rounds to determine customers' satisfaction
- Graduated with honors (Best in PDSA and Top 3 Overall) from in-house management program entitled "Associate - Management In Transition" after finishing a project to automate Tube-feeding diet prescriptions' computations last May 17, 2017
- Led the Diabetes Computations Monitoring Project that qualified as a finalist in the Teamwork Awards on SLMC-GC's Annual Awards
- Conceptualized an Excel tool that minimized the risk of inaccurate computations and mislabeling for critical patient tube-feeding
- Conducted bug-testing of the tool and presented its Plan-Do-Study-Act (Process Improvement) pilot-test results to a panel of judges
